

Day 1: November 24, Tuesday (SGT)

Time	Program	Venue
2:00 PM – 2:05 PM	<p>Opening Message Keibock Lee Editor-in-Chief, NanoScientific President, Park Systems</p>	Lecture Hall
	<p>Welcome Message Beng Seng Poo General Manager, Park Systems Singapore</p>	
2:05 PM – 2:25 PM	<p>Featured Talk Sang-Joon Cho, PhD Park Systems, Korea</p> <p><i>-Optical hybrid SPM technology development and Park Systems Atomic Force Microscopy</i></p>	Lecture Hall
2:25 PM – 2:45 PM	<p>Keynote Talk Professor Nam-Joon Cho Nanyang Technological University, Singapore</p> <p><i>-Nanomechanical mapping of viral protein binding interactions with phosphoinositide receptors and pharmaceutical drug screening</i></p>	Lecture Hall
2:45 PM – 3:45 PM	Invited Talks	Lecture Hall
2:45 PM	<p>Kim Song Tan, PhD Malaysian Rubber Board, Malaysia</p> <p><i>-Studies of natural rubber (NR) based materials using atomic force microscopy (AFM) technique.</i></p>	-
3:05 PM	<p>Junyong Wang, PhD National University Singapore, Singapore</p> <p><i>-Light-emitting diodes based on atomically thin semiconductors</i></p>	-
3:25 PM	<p>Ilka Hermes Principal Scientist Park Systems, Germany</p> <p><i>-Stabilizing the piezoresponse via dual frequency resonance tracking</i></p>	-
3:45 PM – 3:55 PM	Technical Session	Lecture Hall
3:55 PM – 4:00 PM	Virtual Tour	Exhibit Hall

Day 2: November 25, Wednesday (SGT)

Time	Program	Venue
2:00 PM – 2:05 PM	Welcome Message Beng Seng Poo General Manager, Park Systems Singapore	Lecture Hall
2:05 PM – 3:25 PM	Invited Talks	Lecture Hall
2:05 PM	Jake Kim, PhD Park Systems, Korea <i>-A comparative study for surface potential mapping using KPFM</i>	-
2:25 PM	Jae Sung Yun, PhD University of New South Wales, Australia <i>-Probing nanoscale defects in emerging photovoltaic materials using scanning probe microscopy</i>	-
2:45 PM	Persia Ada N. de Yro, PhD Department of Science and Technology, Philippines <i>-Nanomaterials characterization and nanotechnology research in DOST-ITDI</i>	-
3:05 PM	Murni Handayani, PhD Indonesian Institute of Sciences, Indonesia <i>-Two wired single molecular diodes based on porphyrin-imide dyads connected covalently between Single-walled carbon nanotubes as electrodes</i>	-
3:25 PM – 3:45 PM	Featured Talk Ms. Marine Le Bouar Nanotechnology World Association <i>-From lab to market: Strategies and issues in the commercialization of nanotechnology</i>	Lecture Hall
3:45 PM – 3:55 PM	Technical Session	Lecture Hall
3:55 PM – 4:00 PM	Virtual Tour	Poster Hall
